Professional Summary

Software Developer with 4+ years of experience designing, developing, and maintaining efficient web applications. Proficient in PHP (Laravel) and JavaScript (React/Next.js/Vue.js), with extensive knowledge in back-end development and database management. Committed to delivering scalable, high-quality solutions. Experienced in remote international environments (France, Denmark) and building enterprise-grade internal systems.

Experience

Trust Software   **Remote (France based)**
Software Developer   *2023–Present*
- Developed **Espace-Foret**, an innovative platform for land management, agricultural commodities, and tree inventory management.
- Built **Monsouhait**, a digital legacy platform facilitating users in creating secure wills in text, audio, and video formats.
- Created **Celib-Holidays**, a social dating platform featuring real-time chat and user matching algorithms.

PT. Bali Business House (Indosoft)   **Remote (Denmark based)**
Software Developer   *2021–2023*
- Engineered a "Send Package" and tracking feature for the **Risskov Autoferien** hotel booking platform.
- Developed shipping label generation and package tracking features for **Koimad.dk**.
- Implemented a comprehensive product rating and review system to enhance user engagement on e-commerce platforms.

PT. Bringin Inti Teknologi   **Jakarta**
Software Developer   *2020–2021*
- Developed a high-scale internal dashboard to monitor Cash Flow and Hardware Health for **2,748 CRMs** (Cash Recycling Machines) across Indonesia.
- Created a distance calculation API to optimize logistics between Branch offices and CRMs.
- Built a secure **Employee Assessment and Recruitment** portal, making HR processes transparent, structured, and efficient.

PT. Svara Inovasi Indonesia   **Bandung**
Android Developer (Internship)   *June 2019–Aug 2019*
- Contributed to the **Svara** radio and podcast application.
- Developed the Music Library feature for collection management and the "Top Music" chart feature.

Education

Vocational High School 1 Cimahi   **Bandung**
Software Engineering   *2017–2020*

Focus on Basic Logic, Database, Networking, and Laravel Framework.
